PROFESSIONAL SUMMARY

Full Stack Developer Intern candidate with hands-on experience in React, Next.js, Node.js and Python, built through the IBM Full Stack Software Developer Professional Certificate, a NAITA Diploma in Software Engineering and real project work. Comfortable working across the full development cycle, from requirements and Figma design to deployment, with practical exposure to Git, SQL databases and REST APIs. Eager to learn and grow as a developer within a collaborative team.

SKILLS

Programming Languages: JavaScript, Python, Java
Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap 5
Backend: Node.js, Flask, Django, PHP (CodeIgniter)
Databases: MySQL, SQLite, Supabase
Tools & Practices: Git, GitHub, RESTful APIs, Figma, Object-Oriented Programming, data structures

EXPERIENCE

UI/UX Designer & Frontend Developer Intern Jul 2024 – Jun 2025
Regional Development Bank (RDB) – Head Office, Kelaniya, Sri Lanka

- Designed end-to-end user flows, wireframes and high-fidelity Figma prototypes for two enterprise systems used across bank branches: an Entrepreneurship Development System and a User Creation System.
- Translated user requirements into intuitive UI layouts, reducing onboarding friction and improving usability for 100+ internal users.
- Built interactive Figma prototypes and collaborated with backend developers to implement the frontend components in HTML, CSS and JavaScript, keeping live production interfaces consistent with the Figma designs.
- Redesigned key interface screens, achieving a 25% reduction in bounce rate and a 70% increase in user engagement after launch.

PROJECTS

Recover.lk – Migraine Companion App *Next.js, TypeScript, Tailwind CSS,Django Figma*

- Designing and building a migraine companion web app for Sri Lankan patients, featuring an interactive SVG brain map, symptom tracker and dark/light mode, applying user-centered design throughout.
  GitHub: github.com/Recover.lk

ForgeX Fitness – Fitness Centre Website *React, Tailwind CSS, Framer Motion, Node.js, Supabase, Figma*

- Designed and developed a fitness centre website with dark/light mode, AI-powered diet plans, real-time gym traffic, live coach guidance, workout management and a progress-tracking dashboard.
  GitHub: github.com/ForgeX-Fitness-Website

Lomiees – E-Commerce Clothing Store *Python, Flask, SQLite, HTML, CSS, JavaScript, Figma*

- Built a full-stack e-commerce platform (Flask backend, SQLite database, vanilla JavaScript frontend) with an AI-powered size recommender, virtual try-on engine, multi-step checkout and multi-language support.
  GitHub: github.com/Lomiees-Website

EDUCATION

Diploma in Software Engineering – NAITA, Sri Lanka 2023 – 2025
Diploma in ICT – ICBT Campus, Sri Lanka 2021 – 2022
Diploma in English – ICBT Campus, Sri Lanka 2021 – 2022

CERTIFICATIONS

- IBM Full Stack Software Developer Professional Certificate (Python, Flask & AI Applications; Node.js & Express; Generative AI; DevOps)
- Prompt Engineering with GPT
